

Postponed VAT Accounting (PVA)

To Postpone or Not to Postpone?

Import VAT on all imports EU & Non EU can now be postponed and accounted for on your VAT Return, if you so wish.

- There is no application, further guarantees or approval needed to utilise this new process which started 1st Jan 21.
- You just need to log onto your Government Gateway account online and register for CDS to access your statements.
- By Postponing, your import VAT is accounted for in the VAT return, effectively meaning zero liability to be paid, as it is accounted for as both an Input and Output tax simultaneously.
- The saving to you in cash flow, could be immense, as you will not be paying upfront and then waiting three months to reclaim as with the current now, default process. It also avoids having goods held in customs until the VAT is paid. The VAT on your import shipment goes straight to your VAT return. Boxes 1, 4 & 7 will need to be completed.
- You will need to confirm via email to sales@supuk.com should you wish to postpone your import VAT going forward.
- If you do not wish to use PVA, the default option of payment upfront upon import will apply. No email is required.
- If you opt for PVA, You will need to download your monthly statement from your CDS Dashboard via your Government Gateway account. Data is held for 6 months only, so we advise you download the data monthly.
